Home Learning Expectations

Welcome back to a New Year.!

We are focusing our learning on an Around the World theme. If your child has a photo or artefact from travels to a different country, please do send it in for them to share in circle time.

Please continue to read your child's RWI book bag book and record this in their reading record. The children will also bring home a Reading for Pleasure book. This is a text that the children won't necessarily be able to fully decode on their own, but it is a text that they can share and enjoy the magic of sharing a book.

Please continue to watch the daily videos emailed home to support with phonics, reading and spelling. Continuing to promote correct letter formation..

Children should be able to **subitise** amounts from 0 to 8. They see an amount and can say how many, without counting. *"There are 3 trees here and 3 trees there, so that's 6"*

We use the vocabulary fewer and more to compare values.

Using balances and measuring, children compare capacity and weight; using *heavier, lighter, empty, more, full* language

Home Learning

The purpose of home learning is for children to share and extend the knowledge and skills they learn at school into their home environment.

- * Talk about a place you or your child has visited. Share photos and describe it.
- * Try some food originating from another country.
- * Look at maps and flags to talk about the world; animals and what places look like.
